3. stresstest

4. bagian yang menyebabkan stress test berhasil

Secara keseluruhan, stress test ini menunjukkan hasil yang memuaskan dengan tingkat kesalahan yang sangat rendah, yaitu hanya 1,35%. Hal ini menunjukkan bahwa kode saya mampu menangani beban yang diberikan dengan baik dan stabil. Throughput juga menunjukkan angka yang konsisten, yaitu sekitar 4,58 permintaan per detik, yang menunjukkan kemampuan backend untuk memproses permintaan secara berkelanjutan tanpa penurunan kinerja yang signifikan. Waktu respons rata-rata tercatat sebesar 8,204 ms. Meskipun terdapat beberapa lonjakan waktu respons hingga 37,207 ms, sebagian besar permintaan berhasil diproses dalam rentang waktu yang wajar.
